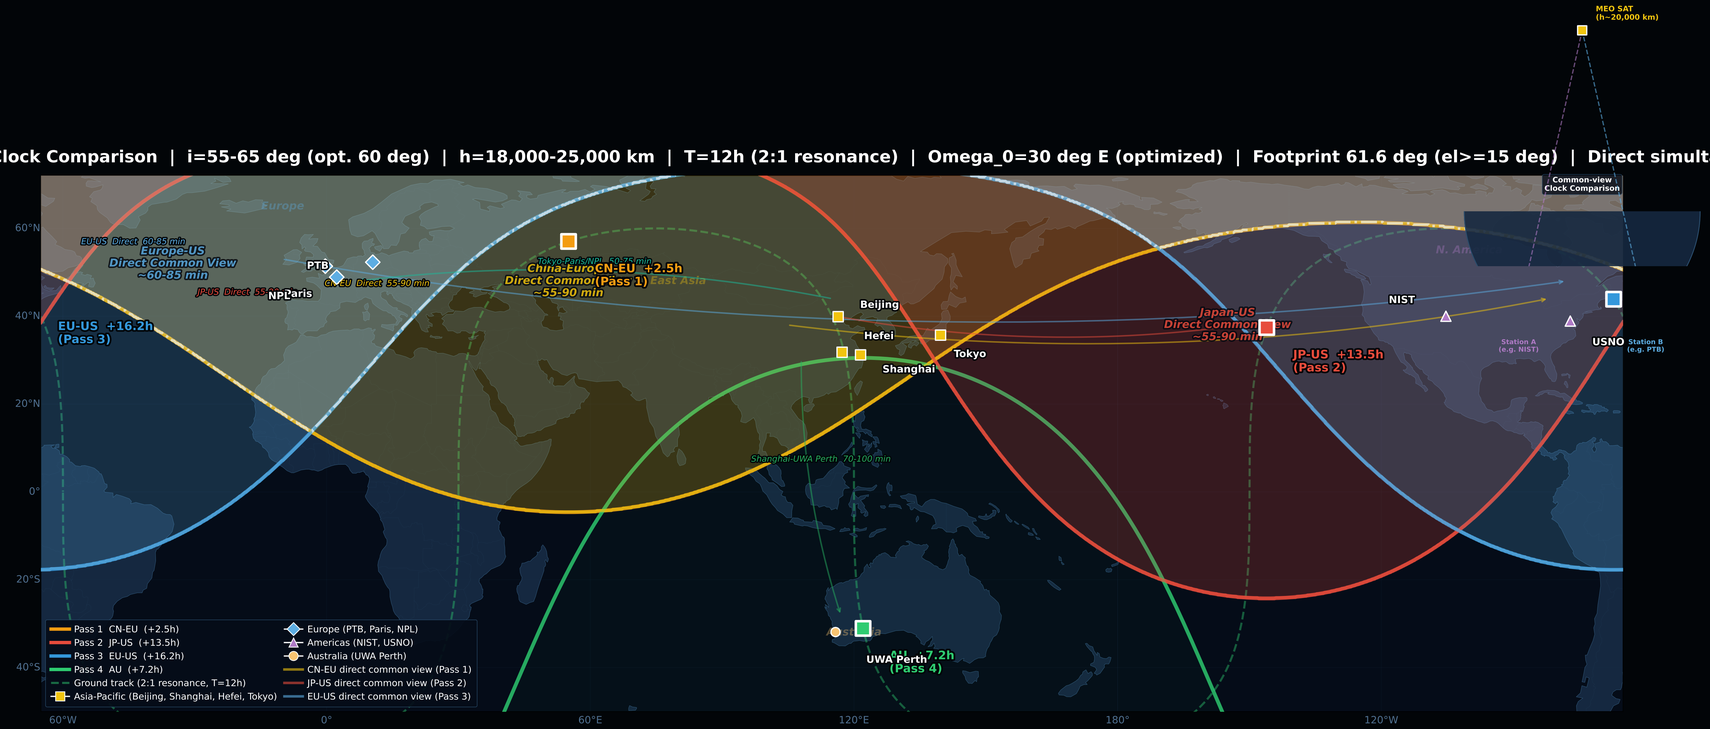
Scheme 1: MEO Single-Satellite Global Optical Clock Comparison | i=55-65 deg (opt. 60 deg) | h=18,000-25,000 km | T=12h (2:1 resonance) | Omega_0=30 deg E (optimized) | Footprint 61.6 deg (el>=15 deg) | Direct simultaneous common view: CN-EU, JP-US, EU-US



Omega_0=30 deg E (grid-searched optimal) | 4 passes: CN-EU (+2.5h), JP-US (+13.5h), EU-US (+16.2h), AU (+7.2h) | Direct simultaneous common view for all 3 intercontinental pairs | Doppler +/-0.70-1.25 km/s | China-centered Plate Carree projection
