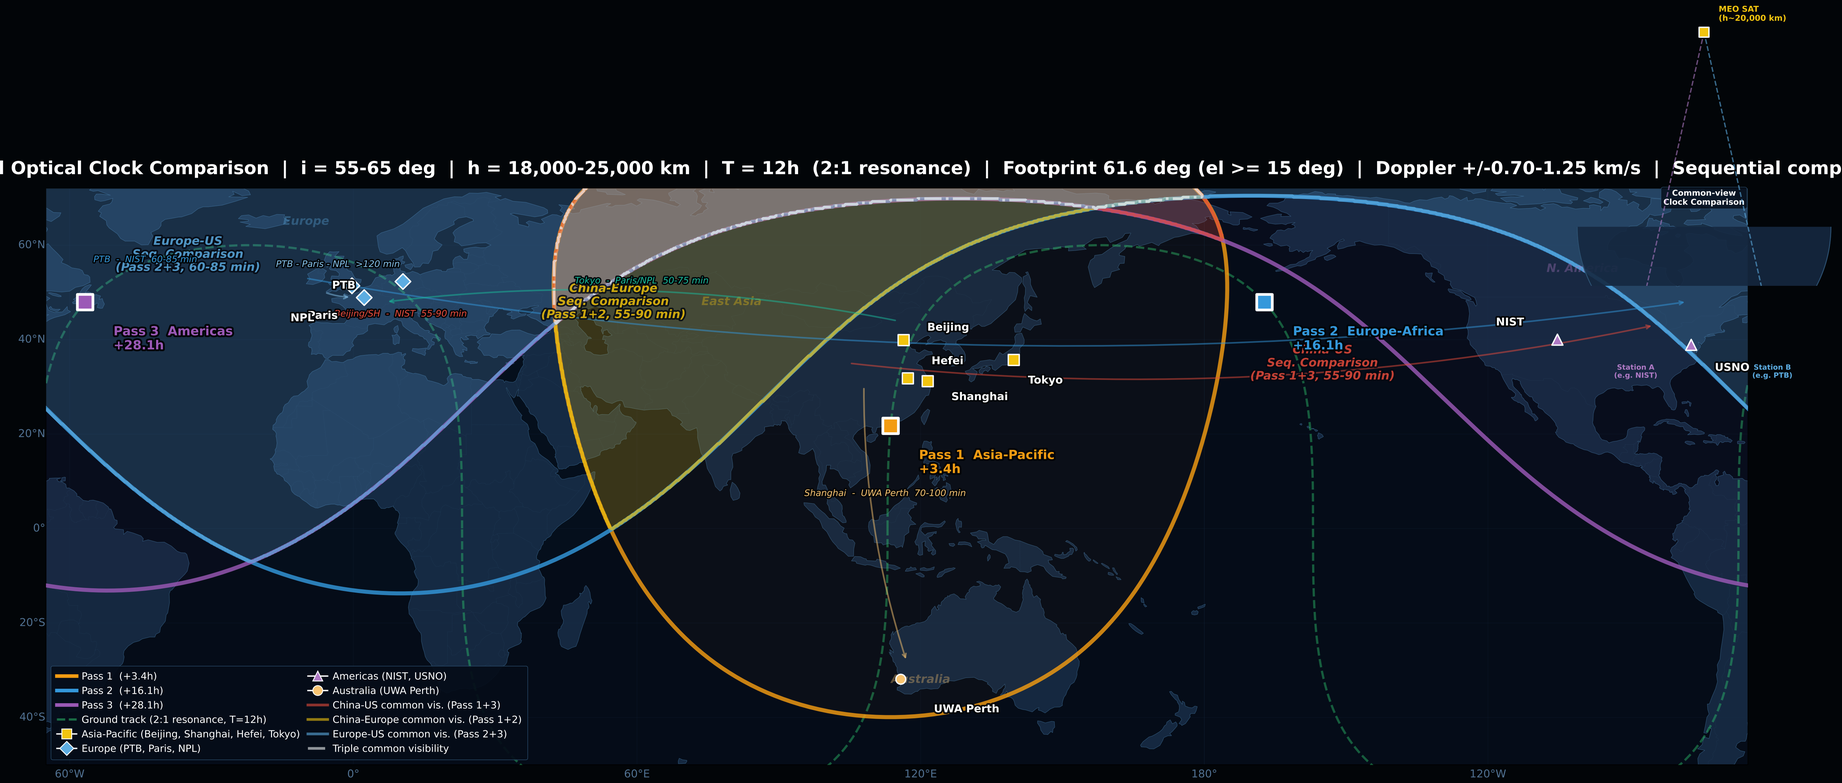
Scheme 1: MEO Single-Satellite Global Optical Clock Comparison | i = 55-65 deg | h = 18,000-25,000 km | T = 12h (2:1 resonance) | Footprint 61.6 deg (el >= 15 deg) | Doppler +/-0.70-1.25 km/s | Sequential comparison via satellite onboard clock



China-centered Plate Carree projection | Extended map for contiguous common-visibility corridors | Common-visibility windows >30 min for all station pairs
